

# SOCIETY WOMEN WHO OWE BEAUTY AND HEALTH TO PE-RU-NA.

There are a Million Women now Ailing Who Should Remember That Pe-ru-na is an Infallible Specific for Spring Colds and Coughs, Lassitude and Nervousness Incident to the First Warm Weather.

MISS MARY E. JUDGE,  
228 RICHMOND ST. WEST  
TORONTO, CAN.

MISS ELLEN CRAWLEY,  
241 S. MADISON  
AVE. LAGRANGE, ILL.

MISS MARTHA KAPLANSKY,  
PRES. "SOKOL" CLUB, 1338 W. 16th ST.  
CHICAGO.

Spring Time the Best Season of the Year to Treat Chronic Catarrh.

Notwithstanding that a Great Number of People Have Been Cured of Chronic Catarrh by Taking Peruna During the Past Cold Season.

Yet It Cannot Be Denied That the Cold, Wet, Stormy Weather Has Retarded Many Cures.

And, in Some Cases, Actually Prevented a Cure.

SPRINGTIME has come at last, and now is the time for all catarrh sufferers to begin a systematic course of treatment for this disease. The greatest difficulty in the way of treating chronic catarrh is that the patient is so liable to catch cold during the treatment and thus delay a cure.

This liability at this season of the year is, in a great measure, removed, and no one should neglect the opportunity to take treatment.

Peruna is acknowledged by everyone to be the only reliable and unfailing cure of catarrh wherever it may be located. When you take Peruna you are not experimenting with an unknown remedy.

MISS MARY E. JUDGE, 228 Richmond St. West, Toronto, Canada, writes:

"I have been troubled with catarrh almost ever since I can remember. About five years ago it settled in the middle ear, causing great difficulty in hearing. I am indeed grateful to say that three bottles of Peruna relieved me so greatly that I felt encouraged to continue its use. After taking eleven bottles more, I was entirely and permanently cured. I had spent hundreds of dollars on bottles of medicine without relief, while \$14 spent for Peruna cured me within a few short weeks."

A Cold in the Head or Throat is Almost Certain to Develop Into Catarrh if Neglected.

CATARRH usually begins as a cold in the head or throat and is neglected until it becomes chronic; then it begins to drain on the system, and the patient is in a very foolish, indeed he will not rest easy until the catarrh is entirely cured. Thousands pay no attention to it until it is too late. If Peruna is used the cold never becomes chronic, and hence catarrh is prevented. But after catarrh has become thoroughly established, Peruna will cure it, but it will take much longer.

Men and women of national reputation as well as thousands in the humbler walks of life publicly endorse Peruna. Peruna does all that is claimed for it. It cures catarrh.

THE FIRST STAGE OF CATARRH.

A Serious Mistake Which Thousands are Making.

THE first stage of catarrh is what is commonly known as "caching cold." It may be in the head, nose, throat or lungs. Its beginning is sometimes so severe as to cause a chill and considerable fever, or it may be so slight as to not hinder a person from his usual business. In perhaps a majority of cases little or no attention is paid to the first stage of catarrh, and hence it is that nearly one-half of the people have chronic catarrh in some form.

To neglect a cold is to invite chronic catarrh. As soon as anyone discovers the first symptoms of catching cold he should at once begin the use of Peruna according to directions on the bottle, and the cold is sure to pass away without leaving any bad effects.

Unless this is done the cold is almost sure to end in the second stage of catarrh which is making so many lives miserable. If Peruna was taken every time one had a cold or cough, chronic catarrh would be practically an unknown disease.

MISS LORETTA WALL, 50 N. Dale St., St. Paul, Minn., writes: "Last spring I had a very severe case of catarrh of the stomach and bowels. I took three bottles of Peruna and found myself gaining very quickly in every way."—Miss Loretta Wall.

MISS ELLEN CRAWLEY, 241 S. Madison Ave., La Grange, Ill., writes:

"For years I had been a sufferer with catarrh of the throat and larynx. I got hoarse on the slightest provocation, and my voice became weak and tired very easily. I could not talk for any length of time and it was very annoying. I was very much discouraged, as nothing seemed to help me until a friend persuaded me to give Peruna a trial. I did not have much confidence in it, but I tried it just to please my friend. My delight, therefore, may be imagined when I began to improve at once, and I have kept right on improving until my voice is strong and I am never hoarse now. Peruna has done a great deal for me."—Miss Ellen Crawley.

MISS W. WASHBURN, 123 S. Villard St., New Orleans, La., writes:

Secretary of Camp No. 2, Sons and Daughters of America, also Recording Secretary of the Lady Standard Mutual Benevolent Association, is a lady of prominence of that place. She writes: "Last spring I caught a severe cold, and I used about ten bottles of Peruna. It settled all over me, and in a few days I had chills and fever with inflammation and headache so that I was unable to do anything. I had one of your bottles in my home, and had read in an indifferent way of the value of Peruna, but when I became sick I thought about it and went for some. I found it truly wonderful. It simply hauled out every sick and ailing place in my body and within a week I was well. I used about ten bottles of Peruna, and have been in the best of health since."—Mrs. W. Washburn.

CATARRH OF LUNGS. Is Generally the Result of a Neglected Cold—Peruna Cures Coughs, Colds and Catarrh.

CATARRH of the lungs is, ordinarily, known as "consumption," also called tuberculosis. In these cases the catarrh has usually found its way into the lungs by the gradual extension of the disease from the throat through the bronchial tubes. Consumption is the natural termination of all cases of neglected chronic catarrh. Every one who is afflicted with chronic catarrh is liable to be attacked with consumption at any time. In the first stages of the disease Peruna is a sure cure; in the later stages of the disease Peruna can be relied upon to produce great benefit, and in a large percentage of cases produces a permanent cure. All those afflicted with this dread disease should begin at once treatment with Peruna.

A slight cough, which, without a vestige of doubt, would soon disappear with the use of Peruna, becomes chronic bronchitis, which requires a persistent use of Peruna for some time. There are a great many cases of consumption every year due directly to a neglect of coughs, colds, etc., which, if Peruna had been kept in the house and used according to directions, would have been prevented.

MRS. L. E. CLAUDE, 20 North Eleventh Street, Newark, N. J., writes: "Peruna has done for me what much medicine of various kinds did not seem to touch. I shall keep it on hand and whenever I catch a cold, or in the future I shall keep it on hand in all respects now well. Appetite good, sleep well and system regular."

MISS MARGARET FAHEY, 9 Adams St., Troy, N. Y., writes: "We have used Peruna in our family for years and I am very pleased to say that it cured me of catarrh of the lungs when the doctors gave up all hope of my recovery. I used Peruna for six months and at the end of that time my cough had disappeared, my appetite was much better and I had gained ten pounds and looked the picture of health. I am in perfect health now and feel that Peruna cured me of all its conditions in Peruna."

The best cure or preventative known to the medical profession up to date for catarrh in all its conditions is Peruna. During the uncertain weather of springtime it is an unnecessary hazard for any one to neglect to guard himself from taking disease by taking Peruna.

MRS. VIOLA MARSHALL, 43 West Mason St., Springfield, Ill., writes:

Two months ago when I caught your advice, and you told me that I was suffering from systemic catarrh. I had gotten so bad that I could not bear the heat of walking and had to lie down most of the time. I began taking your Peruna and now I feel like a new woman. I can walk just as far as I please without feeling any fatigue and I have taken only three bottles of Peruna. I shall never cease praising Peruna nor thanking Dr. Hartman for his kind advice."—Mrs. Viola Marshall.

Peruna is of national fame as a catarrh remedy. It is the only internal, systematic catarrh remedy known to the medical profession. It makes diseased mucous membranes healthy, whether it is the mucous membrane lining the nose, throat, lungs, stomach, kidneys or pelvic organs.

MISS MARTHA KAPLANSKY, President "Sokol" Club, 1338 West 16th St., Chicago, Ill., writes:

"My health was in such a state that my friends were alarmed over my condition. I doctored and took nearly everything that was recommended to me, but nothing seemed to have any effect on me until I took Peruna. My lungs were in a weak condition, were sore all the time, and the slightest cold would settle there. I was scarcely ever free from pain and had lost much in weight. My physician advised a change of climate, and I was about to go away when I was persuaded to try Peruna. I began to improve with the first bottle, and kept steadily improving until I was well. I also gained in weight and feel like my old self again."—Miss Martha Kaplansky.

MISS JUDGE J. F. BOYER, 823 Davis St., Evanston, Ill., writes: "If any one has reason to praise Peruna it is surely myself. Last spring I became so run down from the serious effects of a lingering cold that several complications arose in my system, and I could neither eat nor sleep well and lost flesh and spirit. I finally tried Peruna and it did wonders for me. In two weeks I was like another person, and in a month I felt better than I have ever done before. I thank Peruna for new life and strength."

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

## IRRIGATION TAKEN UP

Government Department Gives Exposition of Subject

## POSSIBILITIES IN KANSAS

Western Kansas Would Be Greatly Benefited.

Special Correspondence of the Eagle, Washington, May 7.—The United States census bureau has given out the following preliminary statement concerning irrigation in the state of Kansas in 1902.

That portion of Kansas in which irrigation is generally necessary for the successful production of crops varies from year to year. During years of scanty rainfall, one-half, and sometimes even more, requires the artificial application of water. When the rainfall is more plentiful and better distributed, irrigation is not essential in more than one-third of the state and, during years of extraordinary precipitation, even the western portion produces abundant crops without irrigation. To this uncertainty in the climate conditions are attributable many of the failures and much of the distress for which this part of Kansas is noted.

When Banger Signals your liver out of order, constipation, or your stomach not working right, it's a sign of distress which, unheeded, will lead to trouble—it is time to take

**Beecham's Pills**

Sold Everywhere. In boxes 10c. and 25c.

The altitude ranges from 400 feet on the western border to less than 1,000 feet in the central portion. There are no elevations rising more than 50 feet above the general level. Erosion has played a conspicuous part in changing the contour, the rivers and small streams having made deep and narrow valleys through the plains. The soil is everywhere very fertile, and needs only moisture to produce bumper crops.

Much of the irrigation has been experimental, and in many cases the results have been unsatisfactory, but the farmers have pointed by their experience and by better methods and greater economy a largely increased area can be brought under cultivation.

**WATER SUPPLY.** In semiarid Kansas, the streams furnish a very limited and quite uncertain supply, and it is only during flood seasons that any considerable area may be watered therefrom. As a result, the irrigation from this source is largely for corn crops. There are many small springs, and streams which are utilized to irrigate small holdings.

The underground water seems to offer the surest and most constant supply and while this source has not yet been utilized to cover in the aggregate many acres, the number of farms thus irrigated is relatively large, showing that ground water may be obtained throughout a wide territory. At the present time, such irrigation is restricted almost entirely to gardens and small orchards but, as the cost of raising water is reduced and machinery capable of delivering large quantities is devised, its application will be more and more extensive.

### GENERAL STATISTICS.

The average annual precipitation for the state in 1902 was 33.5 inches, being 3.8 inches above the normal. It was, however, below normal in the extreme southwestern counties where the average ranged from 20 to 15 inches and less. The increase in irrigation for the three years following 1899 is remarkable when compared with that for the decade 1890-99. In 1902, the total area to which water from streams, springs and wells was artificially applied aggregated 20,022 acres, an increase since 1899 of 3,302 acres, or 22.4 per cent. The increase for the five years ending with 1902 was only 15.5 per cent. The farms on which irrigation was reported in 1902 numbered 1,110 and the irrigated systems in operation, 336. The initial construction cost for the 434 miles of main canals and ditches and the neces-

sary dams, head-gates, reservoirs, pumping plants, etc., was \$26,058. The average first cost per irrigated acre was \$23.71. The increase since 1899 is 250 per cent in number of farms and 224 per cent in total construction cost.

### DRAINAGE BASINS.

Kansas practically belongs to two drainage basins, the Arkansas in the south and the Kansas in the north. Each basin includes about one-half the total area of the state, but more than three-fourths of the irrigated area lies within the basin of the Arkansas.

### ARKANSAS RIVER DRAINAGE BASIN.

The Arkansas river enters Kansas near the thirty-ninth parallel and for 400 miles flows first east, then northeast and finally southeast, reaching its most northern point near the center of the state. It is a wide, shallow stream with many islands and low banks and its average fall per mile is 7 feet. Its principal tributary in Western Kansas is the Cimarron river. In 1902, Arkansas river and tributaries and springs and wells within its drainage basin supplied 87 systems and irrigated 20,190 acres belonging to 832 farms. The systems represented a total construction cost of \$10,256, an average first cost of \$12.80 per irrigated acre. The combined length of the main canals and ditches was 256 miles. Twenty systems received water from the main stream direct and 66 from its tributaries. The remaining 100 systems were supplied. These systems were constructed at an initial cost of \$36,771, an average of \$42.27 per irrigated acre. There were 32 miles of main canal and ditches, an average of 15.6 miles per system. Wells within the basin supplied 42 farms and irrigated 1,338 acres. The 63 systems represented a construction outlay for wells, pumping plants, reservoirs, etc., of \$6,940, an average of \$14.32 for such acre irrigated.

### KANSAS RIVER DRAINAGE BASIN.

The Kansas river, formed by the junction of Smoky Hill and Republican rivers, traverses the central and northern sections of the state. Smoky Hill river rises in the plains of Colorado, flows eastward, receiving the waters of Saline and Solomon rivers. Republican river also head in Colorado and passes through a portion of Nebraska, having a course of 80 miles. In 1902, water from all sources in this drainage basin was utilized through 238 systems to irrigate 2,721 acres belonging to 281 farms. The total construction cost of the 88 miles of main canals and ditches and other irrigation works was \$24,742,

being an average of \$9.06 per irrigated acre. Nine systems, representing a total construction cost of \$17,495, were supplied with water from Republican river and tributaries, and 119 acres belonging to 11 farms were irrigated. The average first cost per irrigated acre was \$23.90, and the total length of main canals and ditches, 61 miles. Water from wells was supplied to 23 farms and 59 acres were irrigated. The 24 well-systems represented a total construction of \$2,262, an average of \$22.64 per irrigated acre.

### PIRST IN JAIL FOR BOY'S DEATH

Bellefonte, Pa., May 7.—Charged with inflicting fatal injuries by beating on a sixteen-year-old boy for refusing to attend school, the Rev. Victor Zarek, rector of the Polish Catholic church at Clarendon, was arrested and locked up in the Bellefonte jail today.

The alleged victim of the priest is Anthony Salko, the charges are brought by Dr. E. Y. Young, the attending physician, who says in his complaint that the boy made an ante-mortem statement a few hours before his death yesterday declaring that Father Zarek had beaten and kicked him.

Father Zarek has always borne a high reputation in this community. It is a man of scholarly attainments and speaks six languages.

Dr. Young alleges that Salko refused to attend Father Zarek's parochial school at Clarendon since the death of his father several months ago, and resented the priest's interference. Father Zarek, it is alleged, undertook to chastise the boy, who resisted, and the priest seized a broomstick.

Father Zarek declines to dispute his case, but his friends say that he undertook to discipline the boy at the request of Mrs. Salko, who had pleaded with her son to attend school. They say Father Zarek employed only a light rod or switch and the death of the boy was due to appendicitis and not from the effects of the whipping.

## KILLING IN TEXAS

Wealthy Planter Shoots Two Prominent Citizens.

## RESULT OF FAMILY FEUD

Tragedy Takes Place Eighty Miles from Austin.

Kansas City, May 7.—A special to the Star from Austin, Texas: A sensational killing occurred today at Luling, eighty miles southeast of Austin. S. L. Nixon, a member of the state Democratic executive committee, and a wealthy planter, shot and killed Wm. H. Mahoney and Col. Verry, two prominent citizens of Luling. The shooting is said to have grown out of an old family feud.

## HAS TWO PERSONALITIES.

Man Found in a Stupor, Becomes a Stranger to Himself.

Cincinnati, May 7.—When something happens the little crew that hide the risk connecting the past and the present, the mental machinery instantly begins to turn in an eccentric manner. This has been demonstrated in the case of S. V. Smith, former employee of the Adams Express Company, Cincinnati, who was found sitting in a doorway of Sixth and Elm streets Saturday night completely bewildered. Investigation has disclosed rare physical phenomena in the case, which the doctors at the City Hospital are now classifying as one of alternating personalities. The past to Smith is a blank. Events in his life which happened a year ago are completely shut out as if the man had never lived. He is conscious of the present, can talk, and can even discern between objects, but that is as far as his intelligence reaches. What happened between the time he left his place of employment, April 1, up

to the time he was found probably never will be known.

One thing is certain—he has traveled far and under adverse circumstances, but in what time will remain a blank unless fragments of the past should suddenly be recalled.

There is nothing to show the patient ever was a drinking man.

His friends never that he always was circumvent in his habits and careful of his health, and that he should suddenly be stricken with a calamity they deem puzzling.

Prior to his wandering away April 1 he complained of pains in the head. At his boarding house, in West Ninth street, Cincinnati, he was told those would soon pass.

He started to work as usual in the morning, but never reached his office.

The Adams Express Company employees say his accounts were correct, and that nothing had occurred to disturb the even tenor of his ways in a business sense.

Then the man stopped and S. V. Smith became a personality, unable to explain his whereabouts or even tell his own name.

A diary, which he carried in his pocket, shows that once before he had become lost to himself and was known as John Robinson.

On each date of the last year are noted his movements. The following one notation after the other it can be seen the man was in constant dread of a pending evil.

her contract at the concert in the Metropolitan opera house Sunday night.

The "ducking" process has already cost the fair Carmen \$100 in the musical season, and now \$200 is to be topped off the \$100 which she was to receive for appearing at the Monday night concert.

The \$200 is to be given to Mayor McChesley for some charitable use.

"Oh, yes," said Mr. Conrad, yesterday, "the \$1000 is going to be paid. But come worthy charity is going to get half of it."

The decision was arrived at after the director had consulted with his lawyers.

Felix Mottl, who is German and speaks little French, and Mme. Calve, who is French, and speaks little German, argued together so long as to the proper as you which her songs should be sung that the hysterics came naturally. "So much to heart did the prima-donna take the argument that she was unable to appear for the second number and is now under the care of her physician. Having carried out half of her contract, Manager Conrad believes she is only entitled to half pay.

A Greek driver for a Chinese importing firm in metropolitan New York, run over an Italian, was arrested by an Irish policeman, and after a German physician had passed upon the injuries of the victim of the accident, the driver was taken before a Hebrew court, who released the prisoner, but an American law firm is trying to collect damages from the Chinese importer.

## BLOOD POISON

Have You New Tonsils, Throat, or other disease? If so, it is a sign of blood poisoning. It is a disease that is often overlooked, but it is a disease that is often fatal. It is a disease that is often cured by the use of Chamberlain's Cough Remedy.

**PENNYROYAL PILLS** are a reliable remedy for all cases of blood poisoning. They are a natural remedy, and they are a reliable remedy. They are a natural remedy, and they are a reliable remedy. They are a natural remedy, and they are a reliable remedy.

**DR. DIX'S** Catarrh Remedy is a reliable remedy for all cases of catarrh. It is a natural remedy, and it is a reliable remedy. It is a natural remedy, and it is a reliable remedy. It is a natural remedy, and it is a reliable remedy.
